Dear Landowner,

You are receiving this letter because your property may be directly or indirectly affected by route alternatives for the proposed Minnesota Power Great Northern Transmission Line (GNTL) project. The alternatives are being evaluated in an environmental impact statement (EIS) that is being prepared by the Minnesota Department of Commerce (Department).

This letter provides you with information on the transmission line project, the route permitting process, and future opportunities to participate in the process. I encourage you to familiarize yourself with the proposed project, sign up for the project mailing list, and participate in the route permitting process.

Project

Minnesota Power (Applicant or MP), in partnership with Manitoba Hydro, proposes to construct a high voltage transmission line (HVTL) from the International border that would terminate at the Blackberry Substation in Itasca County.

The GNTL project includes the construction of a new 500 kV transmission line in Minnesota from the United States/Canadian border to the Minnesota Power Blackberry Substation near Grand Rapids, Minnesota. The 500 kV Line will be approximately 235-270 miles in length, subject to final route approval by the Commission, and will be constructed on a 200 foot wide right-of-way (ROW). The line will provide 883 megawatts (MW) of transfer capability.

Minnesota Power is requesting a route width that is 1,000 to 3,000 feet wide (the actual right-of-way would be 200 feet), with structures typically ranging in heights from approximately 100 feet to 150 feet above ground. The Applicant currently estimates between 4 to 5 structures per mile of transmission line. A variety of structure types (self-supporting suspension, guyed delta suspension, and guyed-V suspension) may be used along the route.

Minnesota Power anticipates that construction on the project will begin in the fall of 2016, with an in-service date of mid-year 2020.

Process

In order for Minnesota Power to construct this high voltage transmission line (HVTL) a route permit must be obtained from the Minnesota Public Utilities Commission (Commission)

(Minnesota Statute 216E.03). Route permit applications are subject to environmental review conducted by Department's Energy Environmental Review and Analysis (DOC-EERA) staff; this reviewed includes the preparation of an environmental impact statement (EIS). Scoping is the first step in the development of the EIS for a project. The scoping process gathers public input regarding potential impacts, mitigation measures, and alternatives to study in the EIS.

DOC-EERA staff gathered input on the scope of the EIS through public meetings held between July 16 and 24, 2014, across the study area. EERA staff also gathered input on the scope of the EIS through a Workgroup. Through this scoping process, route and alignment alternatives-beyond those proposed by Minnesota Power in its route permit application-were identified for study in the EIS. Property records indicate you are located near or own property on one or more of these alternative routes.

The alternatives are described in the Department's EIS scoping decision of January 9, 2015. The scoping decision is available on the Department's website: <http://mn.gov/commerce/energyfacilities/Docket.html?Id=33847> and on the State of Minnesota's eDockets system: <https://www.edockets.state.mn.us/EFiling/search.jsp> (enter the year "14" and the number "21"). An overview map from the scoping decision depicting the route and alignment alternatives being studied in the EIS are attached; more detailed maps of these alternatives can be found at the sites identified above.

Participation

A draft EIS is currently being prepared by EERA staff. The draft EIS will evaluate the potential human and environmental impacts for all of the alternatives in the scoping decision. The draft EIS is anticipated to be completed and available in June 2015. Public meetings and a comment period on the draft EIS will follow. A final EIS will respond to timely and substantive comments on the draft EIS.

Public hearings will be held in the project area after issuance of the draft EIS and are anticipated to occur in July 2015. An administrative law judge (ALJ) from the Minnesota Office of Administrative Hearings will preside over the hearings. Anyone may speak at the public hearings, present evidence, ask questions, and submit comments on the proposed project. The ALJ will make recommendations to the Commission on Minnesota Power's route permit applications. Commission decisions on the applications are expected in December 2015.

Notice of public meetings and public hearings will be published in local newspapers and mailed to persons who register their names on the project mailing list. To add your name to the project mailing list, contact the environmental review manager or public advisor (Tracy Smetana (651-296-0406, consumer.puc@state.mn.us).

Sincerely,

William Cole Storm, Environmental Review Manager
651-539-1844, bill.storm@state.mn.us

CERTIFICATE OF SERVICE

I, Sharon Ferguson, hereby certify that I have this day, served copies of the following document on the attached list of persons by electronic filing, certified mail, e-mail, or by depositing a true and correct copy thereof properly enveloped with postage paid in the United States Mail at St. Paul, Minnesota.

**Minnesota Department of Commerce
Letter to Landowners**

Docket No. E015/TL-14-21

Dated this 9th day of February 2015

/s/Sharon Ferguson
